

# SURFCOM 130

## Mobile surface measuring instrument

The SURFCOM 130 is designed for mobile use in production. The separate control and analysis unit features a touchscreen display and a printer. An interface enables external data storage and professional analysis with ACCTee PRO on a computer.

### Compact tracing driver

- Highly accurate free stylus-and-arm system
- 50 mm traversing length for measuring waviness
- Large deflection range of up to 1.6 mm for measuring roughness on radii
- Easy to exchange the sensing arm

### International analysis parameters

Select the required standard: ISO, CNOMO; ASME, JIS

<b>Straightness accuracy</b>	0.3 $\mu\text{m}/50\text{ mm}$
<b>Traversing length</b>	50 mm

### Touchscreen control unit with integrated printer

The user-friendly touchscreen display is available in color. Thanks to the integrated printer, reports, graphics and notes can be printed easily.

### Virtual notepad

The touch pen allows you to record notes and drawings on the display.

### Configurable user interface

Create a customized menu that only contains the functions you use most.

### User guidance

Helps measuring technicians configure all measuring conditions.

### Automatic function

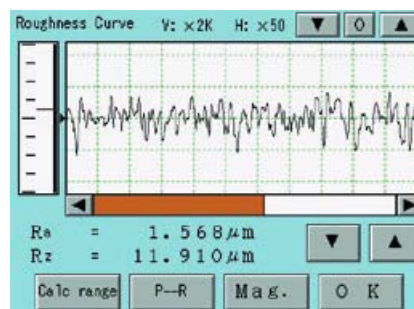

The measuring range, overall measuring length, cut-off and display magnification are automatically configured based on the surface quality.

### Extensive analysis functions

- Evaluate all roughness values as per the standards: Ra, Rz, Rt, Rsm, etc.
- All waviness parameters
- Various filters, profile types and characteristics

### Tilt correction

Six tilt correction methods for profile analysis: line, curve (ARC), first half, second half, beginning/end, spline.

Profile display and parameter results

User-defined main menu

### Special evaluations

Each parameter can be recalculated for selected profile areas. The corresponding area is easily configured via the cursor in the profile.

### Memory card slot

A PCMCIA slot for saving and managing profiles, results, measuring programs and special programs.

### PC interface

RS-232C for professional evaluation with ACCTee PRO roughness software

### Language selection

German, English, French, Spanish, Portuguese and Japanese

# SURFCOM 130

## Accessories

**Roll foot, flat**  
**E-MA-S62A**

Attachment for easy positioning on shafts. For measurable exterior diameters of 60 mm and more

**Roll foot, raised**  
**E-MA-S63A**

Raised attachment for easy positioning on shafts. For measurable exterior diameters of 60 mm and more

**Universal stylus mount**  
**E-DH-S107A**

Stylus mount for measurements on non-flat surfaces  
 $Z = -50$  mm

**Perpendicular stylus mount**  
**E-DH-S17A**

For lateral tracing in the feed direction

**Battery set**  
**E-MA-S65A**

AC adapter, battery, charger

**PCMCIA memory cards up to 1 GB**  
**E-MU-S50C**

Memory card for up to 7000 measuring conditions and measurement data

### Measuring columns

Measuring columns for quickly and accurately adjusting the height and tilt of the tracing driver

Base plate (granite): 400 x 240 x 50 mm  
Max. height (Z): 300 mm

### SURFCOM FLEX

Compact control and analysis unit  
(see p. 22)

### Sensing arms

Excerpt from our stylus catalog

<b>Cat. no.</b>	1059-167	1079-358	1079-356
<b>Length of sensing arm</b>	22 mm	22 mm	15 mm
<b>For boreholes larger than</b>	dia. 7.5 mm	-	dia. 2 mm
<b>For groove depths</b>	<4 mm	<15 mm	-
<b>Measuring range</b>	± 400 µm	± 400 µm	± 400 µm
<b>Stylus tip</b>	2 µm/60°, diamond	2 µm/60°, diamond	2 µm/60°, diamond

<b>Cat. no.</b>	1084-495	1128-388	1054-833
<b>Length of sensing arm</b>	62 mm	15 mm	62 mm
<b>For boreholes larger than</b>	dia. 2 mm	-	-
<b>For groove depths</b>	-	-	<15 mm
<b>Measuring range</b>	± 800 µm	± 400 µm	± 800 µm
<b>Stylus tip</b>	2 µm/60°, diamond	2 µm/60°, diamond	2 µm/60°, diamond

# SURFCOM FLEX

## Mobile control and evaluation unit

The SURFCOM FLEX is an easy-to-use control and evaluation unit with an integrated printer. It can be used in combination with the HANDYSURF and SURFCOM 130 tracing drivers. Thanks to its ease of use and robustness, the SURFCOM FLEX is at home in the workshop.

The SURFCOM FLEX with optional clamping device for the E-35B or E-40B tracing driver

### Small, lightweight and flexible

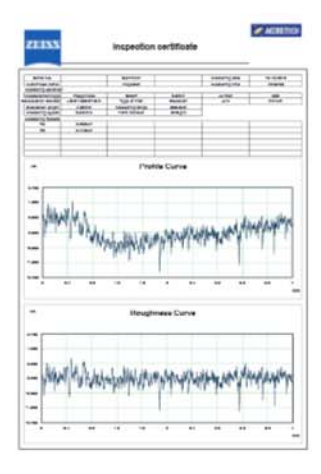

Thanks to its compact size and robust design, the SURFCOM FLEX controller can be easily transported and used anywhere. The small device also houses a printer. The 8.9 cm color display is very easy to read. Measuring results can be displayed numerically and graphically. They can also be printed using the report printer. The SURFCOM FLEX can also be operated using a battery. A power supply unit is also included.

### Memory and interfaces

Measuring conditions and results can be stored on the internal memory or on the enclosed 8 GB memory card (standard USB). A mini USB interface enables data evaluation on a computer. Excel-based evaluation software is included.

### Options

- Holder for the E-35 or E-40 tracing driver
- Data transmission to CALYPSO coordinate measuring machine software for roughness, size, form and position in one report

SURFCOM FLEX report

## System combination

### SURFCOM FLEX 35/40

For surface measurements on all flat surfaces – even vertically and overhead.

### SURFCOM FLEX 45

For surface measurements in the axial direction in tight spaces, e.g. to measure crankshaft pins.

### SURFCOM FLEX 50

Surface measurements with the SURFCOM 130 tracing driver. To capture roughness, profile and waviness parameters.
