

Captured gas leak from production site.

Captured gas leak.

FLIR G300 a

Optical Gas Imaging Cameras For Continuous Gas Leak Detection

Optical gas imaging cameras from FLIR can visualize and pinpoint gas leaks that are invisible to the naked eye. With an optical gas imaging camera it is easy to continuously scan installations that are in remote areas or in zones that are difficult to access.

Continuous monitoring means that you will immediately see when a dangerous or costly gas leak appears so that immediate action can be taken. Optical gas imaging (OGI) cameras are widely used in industrial settings, such as oil refineries, natural gas processing plants, offshore platforms, chemical/ petrochemical complexes, and biogas and power generation plants.

OGI cameras like the FLIR G300 a can detect harmful VOC's (volatile organic compounds) that can seriously harm the environment.

FLIR G300 a optical gas imaging camera can be easily integrated in housings with application specific requirements.

COOLED DETECTOR MAKES THE SMALLEST TEMPERATURE DIFFERENCES VISIBLE

FLIR G300 a contains a cooled Indium Antimonide (InSb) detector that produces thermal images of 320×240 pixels. With its low F-number and high sensitivity, G300 a detects the smallest of leaks.

The high sensitivity mode further enhances the detection level of the camera so that the smallest gas leaks can be detected.

EASY TO CONTROL

All models are easy to control from a safe distance. They can be fully controlled over Ethernet. They can easily be integrated in a TCP/ IP network.

AVAILABLE LENSES

The FLIR G300 a is available with a 23 mm (FOV: $24^{\circ} \times 18^{\circ}$) or 38 mm (14.5 x10.8) lens. Longer lenses give you a narrower field of view so that you can detect gas leaks from further away.

FLIR G300 A DETECTS THE FOLLOWING GASES:

Benzene, Ethanol, Ethylbenzene, Heptane, Hexane, Isoprene, Methanol, MEK, MIBK, Octane, Pentane, 1-Pentene, Toluene, m-xylene, Butane, Methane, Propane, Ethylene and Propylene.

Technical specifications FLIR G300 a

Imaging & Optical Data	FLIR G300 a			
IR resolution	320 × 240 pixels			
Thermal sensitivity/NETD	<15 mK @ +30°C (+86°F)			
Field of view (FOV)	24° × 18° with 23 mm lens; 14.5 ×10.8 with 38 mm lens			
Minimum focus distance	0.3 m (1.0 ft.) for 23 mm lens; 0.5 m (1.64 ft.) for 38 mm lens			
F-number	1.5			
Focus	Automatic using FLIR SDK, or manual			
Zoom	1–8× continuous, digital zoom			
Digital image enhancement	Noise reduction filter, High Sensitivity Mode (HSM)			
Detector data				
Detector type	Focal Plane Array (FPA), cooled InSb			
Spectral range	3.2–3.4 µm			
Image presentation				
Automatic image adjustment	Continuous/manual; linear or histogram based			
Manual image adjustment	Level/span			
Image presentation mo	des			
Image modes	IR-image, High Sensitivity Mode (HSM)			
Electronics and data ra	Electronics and data rate			
Full frame rate	60 Hz			
Temperature ranges				
Temperature range	-20°C to +350°C (-4°F to +662°F)			
Temperature range Video streaming	–20°C to +350°C (–4°F to +662°F)			
Temperature range Video streaming Non-radiometric IR-video streaming	–20°C to +350°C (–4°F to +662°F) RTP/MPEG4			
Temperature range Video streaming Non-radiometric IR-video streaming USB	–20°C to +350°C (–4°F to +662°F) RTP/MPEG4			
Temperature range Video streaming Non-radiometric IR-video streaming USB USB	–20°C to +350°C (–4°F to +662°F) RTP/MPEG4 Control and image
