The CM-M6 has a built-in 3.5-inch color LCD that can display measured values both numerically and on colored graphs, for easier visualization of results.

The CM-M6 is a compact, lightweight, multi-angle spectrophotometer. Incorporating a new patented 'double-path optical system', it exhibits outstanding versatility in various measuring applications.

earlier models can be stably measured.

Multi-angle measurements (1 light source, 6 viewing angles)

Double-path optical system

The CM-M6 has duplicate illumination/viewing systems symmetrical about its center axis. This system ensures high measuring stability even when the instrument is slightly tilted and makes it possible to stably measure R300 curved surfaces like side mirrors.

Compact, lightweight, vertical format

The compact body (with hand strap) can be stably held with one or two hands. Moreover, it is loaded with features ideal for measuring vehicle exteriors such as a rubber cover around the measurement aperture to safeguard measurement subjects against scratching and Bluetooth[®] support (option) for sending measurement data to remote devices over wireless connections.

Ø6 mm diameter viewing beam for measuring small surfaces

The viewing beam is 6 mm in diameter, so small surfaces that were hard to measure with

SAFETY PRECAUTIONS

For correct use and for your safety, be sure to read the instruction manual before using the

instrument. Always connect the instrument to the specified power supply voltage. Improper connection may cause a fire or electric shock.

Be sure to use the specified batteries. Using improper batteries may cause a fire or electric shock.
